- 1. The data used in calculating rate base are averages.
- 2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.

Accountant's Compilation Report

I have compiled the accompanying prescribed Municipal Utility Annual Report of the Morrisonville Sanitary District No.1 for the year 1998. Nonfinancial statistical information was prepared by management.

My compilation was limited to presenting, in a form prescribed by the Wisconsin Public Service Commission, information that is the representation of management. I have not audited nor reviewed the accompanying Report, and do not express an opinion or any other form of assurance on it.

The Municipal Utility Annual Report is presented in compliance with the requirements of the Wisconsin Public Service Commission. These requirements differ from generally accepted accounting principles. Accordingly, this report is not designed for those who are not informed about such differences

1998 Analytical Review DWCCA-3870-ELE

Dear Ms. Repas:

The Public Service Commission has completed their analytical review of your 1998 annual report. The primary purpose of our analytical review is to detect possible accounting related errors and to identify significant fluctuations from prior year's data, which are not sufficiently explained in the footnotes of your annual report. Our review did not identify any such issues. We are closing the review of your 1998 annual report.

Thank you for your efforts in preparing your 1998 annual report. If you have any questions, please feel free to contact me at (608) 266-3768.

Sincerely,

Elaine Engelke Financial Specialist Division of Water, Compliance, and Consumer Affairs
